PERSONAL PORTFOLIO WEBSITE

Project Report

Prepared by: Jayachandran

A responsive personal website to present education, skills, projects, certificates and contact information.

1. Introduction

The Personal Portfolio Website is a web-based profile that introduces the developer and presents selected academic and technical work in one place.

The website uses HTML, CSS and JavaScript. It is designed with a dark visual theme and responsive layouts for desktop and mobile screens.

2. Project Objectives

- Create a clear online profile for an IT student.
- Present education, skills, projects and internship certificates.
- Provide links to GitHub, LinkedIn and email contact.
- Make navigation simple with smooth scrolling and active section highlighting.
- Provide a responsive experience on smaller screens.

3. Technologies Used

- **HTML:** Structures the website sections and content.
- **CSS:** Controls layout, colors, typography, cards, hover effects and responsive design.
- **JavaScript:** Adds typing animation, active navigation, mobile menu and back-to-top behavior.
- **Font Awesome:** Displays interface and social icons.

4. Website Sections

- **Home:** Introduction and developer avatar.
- **About:** Short personal and professional introduction.
- **Skills:** Technical skills and learning areas.
- **Projects:** Hospital Management System and Student Marklist System cards.
- **Education:** B.Tech Information Technology details and PKIET college identity.
- **Certificates:** Internship certificate previews and view links.
- **Contact:** Gmail compose link and social profiles.
- **Footer:** Copyright information and back-to-top control.

5. Main Features

- Sticky navigation bar with a glass-style background.
- Active navigation link highlighting while scrolling.
- Smooth scrolling between sections.
- Typing text animation in the hero section.
- Mobile navigation menu toggle.
- Project cards with GitHub repository links.

- Internship certificates displayed using PDF previews.
- Gmail compose button for contacting the developer.
- Back-to-top button.

6. Projects Presented

Hospital Management System: A project listed in the portfolio with a GitHub Code link. Repository: https://github.com/jayachandran-05/Hospital-Management-Project

Student Marklist System: A project listed in the portfolio with a GitHub Code link. Repository: https://github.com/jayachandran-05/Student-Management-Systems

7. Certificates and Education

The Certificates section contains two internship certificate files: MicroLabs.pdf and ShadowFox.pdf, stored in the certificates folder and previewed on the page.

The Education section identifies the B.Tech Information Technology programme and the Perunthalaivar Kamarajar Institute of Engineering and Technology (PKIET), Karaikal. A college logo can be stored at images/pkiet-logo.png.

8. Project Folder Structure

```
my-portfolio/
■■■ index.html
■■■ style.css
■■■ script.js
■■■ images/
■ ■■■ profile.png
■ ■■■ pkiet-logo.png
■■■ certificates/
■■■ MicroLabs.pdf
■■■ ShadowFox.pdf
```

9. How to Run the Project

- Open the my-portfolio folder in Visual Studio Code.
- Ensure index.html, style.css and script.js are in the project root folder.
- Keep profile.png and pkiet-logo.png inside the images folder.
- Keep the certificate PDFs inside the certificates folder.
- Open index.html in a browser, or use the VS Code Live Server extension.

10. Future Enhancements

- Publish the static website using GitHub Pages.
- Add project screenshots and live demo links.
- Improve accessibility with descriptive labels and keyboard-friendly navigation.

- Add a working backend contact form if required.

11. Conclusion

The portfolio website brings the developer's profile, education, skills, projects, certificates and contact options together in a single responsive website. It can be expanded over time as new skills and projects are completed.

Note: This report documents the features and file names discussed during the portfolio-building conversation. Any item not yet added to the local project should be checked before final submission.
